1. Composition
Loperamide hydrochloride 2mg per tablet. For ingredients see Section 6.4.

2. Pharmaceutical Form
Imodium Instants are white to off-white, dispersible (dissolve in the mouth), circular, freeze-dried tablets. Imodium Instants must not be used when inhibition of peristalsis is to be avoided due to the possible risk of significant sequelae, such as megacolon, bowel obstruction and intestinal perforation. Imodium Instants are not recommended for treatment of ileus, paralytic or non-paretic ileus due to the potential risk of bowel obstruction.

3. Indications
This medicine is used to treat sudden short-lived (acute) diarrhoea in adults and children aged 12 years and over. It can also be used to treat diarrhoea associated with inflammatory bowel disease (IBD) or peptic ulcer disease in adults aged 18 years and over after your doctor has diagnosed you are suffering from this condition.

4. Dosage
Check all tablets before use to ensure none of tablets to take. Stick back all tablets in the blisters. Do not push the tablet through the lid. Place the correct number of tablets on the tongue. The tablets dissolve quickly, so you don't need to chew them. Do not chew.

5. Contained ingredients
Do not repeat the same prescription without consulting your doctor.

Loperamide Hydrochloride 2mg/ Tablet

6. Special Warnings and precautions for use
Inflammatory bowel disease (IBD) or peptic ulcer disease in adults aged 18 years and over.

To treat sudden short-lived (acute) diarrhoea:

Table 1 displays ADRs that have been reported with the use of loperamide HCl from either clinical trials or post-marketing experience.

7. Possible side-effects
This medicine is generally well tolerated, like all medicines, although these don't affect everyone and are usually mild.

8. Pharmacological Properties
This medicine is indicated for the treatment of acute diarrhoea. There is evidence that loperamide has an antidiarrhoeal effect and that drugs that accelerate gastrointestinal transit may decrease its effect.

9. List of Ingredients
This medicine contains in Imodium Instants: Loperamide Hydrochloride 2mg per tablet:

- Gelatin, maltitol, aspartame, mint flavour and sodium hydrogen carbonate.

- Carbomer 934, xanthan gum, sodium lauryl sarcosinate, disodium edetate, polyethylene glycol 400, sodium hydrogen carbonate, vegetable fat (soybean oil), sorbitol, glycerol, water.

- Aerosol propellant (isobutane and carbon dioxide).
