Quinol® Ciprofloxacin Tablets

**Composition:**
S era 750 film coated tablet contains Ciprofloxacin Hydrochloride equivalent to Ciprofloxacin 750 mg.
Senior 500 film coated tablet contains Ciprofloxacin Hydrochloride equivalent to Ciprofloxacin 500 mg.

Ciprofloxacin is an antibacterial agent. It is effective against a wide range of susceptible organisms caused by: lower respiratory tract infections (not for pneumococcal pneumonia), skin and soft tissue infections, gastrointestinal tract infections, sexually transmitted diseases, urinary tract infections, and eye infections.

**Uses:**
- Infection caused by susceptible bacteria.
- Treatment of bacterial infections.
- Treatment of infections caused by susceptible bacteria before the results of laboratory tests are known.
- Treatment of infections caused by susceptible bacteria when prolonged therapy is required.

**Dosage:**
- Oral: Rapid (~50% to 85%).
- Intravenous: Direct injection into a vein.
- Intramuscular: Deep muscle injection.
- Intrathecal: Direct injection into the spinal fluid.

**How to use:**
- Take this medication exactly as prescribed by your doctor.
- Do not take other medications simultaneously unless otherwise directed by your doctor.
- Take with plenty of liquid to avoid irritation of the lining of the stomach and intestines.

**Actions:**
- Bactericidal action on susceptible bacteria.
- Interferes with the synthesis of DNA in susceptible bacteria.
- Inhibits the replication of DNA.
- Causes the death of bacterial cells.

**Contraindications:**
- Patients with a history of tendon problems during previous treatment with antibiotics such as ciprofloxacin.
- Patients with a history of peripheral neuropathy.
- Patients with myasthenia gravis.

**Precautions:**
- Make sure you know how you react to Ciprofloxacin.
- Do not use if you have a history of tendon problems during previous treatment with antibiotics such as ciprofloxacin.
- Do not use if you have a history of peripheral neuropathy.
- Do not use if you have a history of myasthenia gravis.

**Adverse Effects:**
- Infectious diarrhea.
- Prolonged or very rare hallucinations or seizures.
- Skin rash, urticaria, allergic reactions, fever, swelling.
- Nausea, diarrhea.

**Side Effects:**
- Very rare side effects (less than 1 in every 10,000 people are likely to get these):
  - Changes to the blood count (leukopenia, leukocytosis, neutropenia, thrombocytopenia).
  - Pancreatitis.
  - Inflammation of the wall of the blood vessels (vasculitis).
  - Nephritis.
  - Inflammation of the bowel (colitis) linked to antibiotic use.
  - Stomach pain.

**Overdosage:**
- In case of overdosage stomach should be emptied by vomiting if possible.
- Overdosage: Stomach should be emptied by vomiting if possible.

**Interactions:**
- Some medicines can increase the level of Ciprofloxacin in the blood.
- Some medical conditions can influence the effectiveness of Ciprofloxacin.

**Stability:**
- Do not use if the product is expired.
- Do not use if the product is cloudy.
- Do not use if the product is discolored.

**Storage:**
- Store at room temperature.
- Do not use beyond the expiry date or if the product shows any sign of deterioration.

**Importance of Medication:**
- Medicament is a product which affects your health and its use, misuse, or use contrary to instructions is dangerous for you.
- Do not by yourself interrupt the period of treatment prescribed for you.
- Medicament should be used only with the prescription of a doctor.
- Medicament should be used only with the prescription of a doctor.
- Medicament should be used only with the prescription of a doctor.
