What is to be kept in mind:

1. What Biltricide is and what it is used for

    Biltricide is a medicine to treat certain infections caused by parasites that parasitize the body.

2. How to take Biltricide

    The recommended dose is:

    - For adults: 40 mg/kg BW, divided into 3 single doses a day for 1 day.
    - For children aged 4 years and older: 20 mg/kg BW, divided into 3 single doses a day for 1 day.
    - For children aged under 4 years: 10 mg/kg BW, divided into 3 single doses a day for 1 day.

    The film-coated tablet has 3 score lines for dividing into doses of 150 mg each, allowing the dosage to be adjusted exactly to your body weight. If you need a lower dose, you can break off the film-coated tablet at one of the outer score lines. Each film-coated tablet contains 40 mg of praziquantel, the active substance.

3. How to take Biltricide in combination with other medicines

    - If you are taking other medicines that increase the breakdown of praziquantel (synergistic effect of medicines that increase the breakdown of praziquantel), the blood concentration of praziquantel can be reduced.
    - If your kidney function is impaired, the excretion of praziquantel is likely to be impaired.
    - If you are allergic to praziquantel or any of the other ingredients of this medicinal product, do not take this medicine.

4. What to do in case of loss or damage

    If you lose your tablets, you should contact your doctor or pharmacist as soon as possible. The tablets should be kept out of the reach of children.

5. Special precautions for use

    - Praziquantel can cause liver damage, and this should be taken into account when using Biltricide.
    - Praziquantel can cause liver damage, and this should be taken into account when using Biltricide.

6. Possible side effects

    The side effects vary depending on the dose and duration of Biltricide treatment. They can lead to potentially dangerous complications (symptoms that are characteristic of the causative condition, such as fever, jaundice, malaise, and gastrointestinal disorders). They can also lead to potentially dangerous complications (symptoms caused by the medicament itself, such as liver enzyme abnormalities, nausea, and vomiting).

7. Other medicines and Biltricide

    There are no known interactions between Biltricide and other medicines.

8. Reporting of side effects

    If you experience side effects of the medicament, ask your doctor or pharmacist.

9. In case of overdose

    If you overdose, you should contact your doctor or pharmacist as soon as possible. Do not repeat the same prescription without consulting your doctor.

10. In case of emergency

    In case of emergency, contact your doctor or pharmacist. Do not repeat the same prescription without consulting your doctor.

11. Name and number of the medicinal product

    Biltricide is available in packs of 6 and 1000 film-coated tablets.

12. Shelf-life

    The expiry date is the last day of the month in which the medicament is no longer effective.

13. Disposal

    Do not repeat the same prescription without consulting your doctor.

14. Instructions for use

    Follow the instructions of the pharmacist who sold the medicament.

15. How to store

    Keep out of the reach of children. Store in a cool and dry place. Do not repeat the same prescription without consulting your doctor.

16. Instructions for use

    Follow the instructions of the pharmacist who sold the medicament.

17. How to store
